

C# Software Engineer

THE COMPANY:

Lanvera is a leading Customer Communications Management (CCM) outsourcing and technology company specializing in the design, production, and multi-channel delivery of secure customer communications including invoices, statements, tax forms, collection letters, compliance notices, and other business critical documents. With 30 years of experience in CCM, Lanvera has a strong presence in the Financial Services and Insurance industries, and continues to expand into other markets.

THE POSITION

The Lanvera core team is responsible for leading a coordinated technology approach to developing and maintaining Lanvera's primary digital channels. Our goal is to create a seamless experience across our mobile and web platforms that are powerful yet simple for our customers to use. The C# Software Engineer has a strong technical background with hands-on experience in designing, developing, and implementing business software applications. As a member of this small engineering team, you will be building, maintaining, and supporting software that drives the growth in the company.

RESPONSIBILITIES:

- Thrive in fast paced agile/scrum environment and strong aptitude for learning new technologies
- Translate business requirements and technical specifications into development activities
- Create and document system designs using standard software design patterns
- Implement high quality, secure and maintainable code that conforms to coding standards
- Work with other teams to facilitate the build, deployment, configuration and support of applications
- Unit test and debug applications using both automated and manually executed test cases
- Clearly communicate status and open issues to team and manager
- Work effectively within a team environment to implement projects in a timely manner
- Provide technical leadership and guidance to both your team members and your project peers

REQUIRED SKILLS:

- Bachelor's Degree in Computer Science or related field
- 5+ years .NET - C#, MVC, XML, Javascript, JSON
- Web service/Service Oriented Architecture, HTML 5, REST or Web API development
- 3+ years MS SQL Server skills, MongoDB a plus
- Strong understanding of Service Oriented Architecture and Web services layer development
- Excellent communications skills, both verbal and written, including good technical writing and interpersonal skills.

COMPANY BENEFITS:

Lanvera offers excellent benefits including three weeks of PTO, Health Insurance, 401K with dollar matching, profit sharing, and long-term disability.
